Locking cassettes & carry cases available

Our Commitment to Service Excellence
Armor Safe Technologies cares about customers as much as we do our products. We take pride in providing cash management solutions that improve workplace safety, enhance operational efficiency and increase financial accountability.

We are committed to providing unsurpassed customer care so that you can focus on your business with the confidence that your assets are safe. Our products provide the industry's most advanced security features, but they are also designed to be easy to operate and repair without compromising your cash security. Our skilled technicians can help you troubleshoot many challenges over the phone, but should you need additional on-site support, we have the best service team in the business.

When you purchase an Armor safe, it arrives ready to use. We provide installation and commissioning services so that our products integrate flawlessly with your operations. And if you need us, we are on-call to help you 24/7…your rock around the clock.

SAFE TECHNOLOGIES
Changing the way the world counts cash.

SAFE TECHNOLOGIES
Changing the way the world counts cash.

The CacheSYSTEM® 1200 series is a remote solution that enables complete flexibility and accountability. Multiple cash-counting and validation safes can be connected to a control unit from up to 4000 feet away. The control unit provides a comprehensive audit trail of cash activity in remote-location safes.

CacheSYSTEM 1200 series safes can serve as remotes to the CacheSYSTEM 1000 control module or to the CacheSYSTEM 2400 or 7000 series safes, which collect, report and print all transaction data from the remote units.

CS-1000

1200 series safes can be controlled remotely by the CS-1000 control module.

CS-2492

1200 series safes can also be operated remotely by CS-2400 or CS-7000 series

CS-1262

CS-1261

CS-7900

CacheSYSTEM 1200 remote solutions:

Collect and Secure Cash: Once your cash is placed in an Armor safe, you can rest assured it will stay there. Our products are designed and constructed to rigorous standards to protect each point of access and reduce your risk of robbery.

Count and Validate Funds: Each safe is equipped with casino-quality bill validators that provide the highest level of first-time bill acceptance and unsurpassed counterfeit detection. Counted funds are secured in cassettes for easy transport and deposit. This series may be fitted with up to four validators.

Audit and Report Activity: Audit and reporting activity is performed by a control unit (CS-1000, 2400 or 7000 series). The control unit records all remote transactions through each user's unique personal identification number (PIN), providing a seamless audit trail. More than 30 different types of receipts and reports can be printed on the system's high-speed printer, including end-of-day activity, cash removal and individual user reports.

Communicate: The CS-1000, 2400 or 7000 series control units integrate effortlessly with CacheTalk™ III software, allowing the user to access and evaluate transaction data and provide real-time comparisons with POS activity.

CacheSYSTEM 1200

- ☑ Collect and Secure Cash
- ☐ Count and Validate Funds
- ☐ Dispense Change
- ☐ Audit and Report Activity
- ☐ Control Remote Safes
- ☐ Communicate

CacheSYSTEM 1261

The 1261 model is the perfect solution if your space is limited. The safe contains a single bill validator that stores up to 1200 bills and has the smallest footprint of all of our units at only 7" wide. Weighs 90 pounds.

Specifications
Single-note validator dimensions:
7"W x 15"D x 22½"H (31"H with optional base)

Bulk-note validator dimensions:
7"W x 18"D x 22½"H (31"H with optional base)

Approximate weight: 90 lbs
Power supply: auto ranging for international or domestic use

CacheSYSTEM 1262

For more cash intensive businesses with remote needs, the 1262 provides two bill validators, doubling the capacity of the 1261 model. Some customers select this model because a second bill validator serves as back up if the first reaches capacity or becomes jammed. Weighs 165 pounds.

Specifications
Single-note validator dimensions:
12"W x 20"D x 25¼"H (31"H with optional base)

Bulk-note validator dimensions:
12"W x 23"D x 25¼"H (31"H with optional base)

Approximate weight: 165 lbs
Power supply: auto ranging for international or domestic use

CacheSYSTEM 1200 Series Features

Structural Features
- ¼-inch steel plate body and self-locking vault door
- Three 1-inch chrome-plated locking bolts protected by a drill-resistant hard plate and a spring-loaded relocker
- Interlocking back flange to prevent hinge attack
- Four floor holes for bolt down

Technology Features
- Single or double, locking or non-locking 1200-note cassettes
- Single or bulk-note Mars Cashflow® bill validators

Optional Features
- Base with drop compartment
- Extended warranty
- Individual or group product training

CacheSYSTEM 2400 Series

The CacheSYSTEM 2400 series saves time, boosts productivity, and increases employee security with less cash exposure. It is ideal for cash-intensive businesses that do not require change-fund management.

CS-2492

CacheSYSTEM 7000 Series

The CacheSYSTEM 7000 series provides the ultimate level of cash control by limiting cash exposure and providing seamless accounting between the POS and your bank. It offers the combined benefits of cash-counting and bill validation with change-fund management and an audit trail of all transactions.
