For businesses needing a secure change fund but not requiring an audit trail, the CS-3400 is a cost-effective solution. The vending magazine has been designed with your cash security top-of-mind; it allows for a visual inventory so that cash exposure is limited and can be secured with an additional padlock. The change fund tubes can be manually loaded and adjusted, reducing maintenance calls and providing flexibility for your fund denominations.

Specifications

Dimensions: 21½" W x 20" D x 31" H

Approximate weight: 380 lbs

Power supply: auto ranging for international or domestic use

CS-3400

The CacheSYSTEM 3400 series provides a cost-effective solution if your primary needs are to:

Collect and Secure Cash: Once your cash is placed in an Armor safe, you can rest assured it will stay there. Our products are designed and constructed to rigorous standards to protect each point of access and reduce your risk of robbery. The 3400 model includes a drop drawer with an anti-fish baffle and five cubic feet of storage space. Funds can be secured with single or dual combinations, and an additional padlock may be applied in situations of heightened risk. Your cash is secured against robbery with wrong-try lockout and a door handle that breaks off during forced attack.

Dispense Change: Our 120-tube vending magazine is simple to load and count with capacity for 12 tubes in each of 10 columns. The inner view provides a visual count of your change funds, eliminating the need for a dipstick or physical count. The vending magazine can be easily accessed to reposition askew vending tubes. The time-delay feature provides convenience and security with immediate access to the first tube and a programmable delay of up to 15 minutes for subsequent tubes.

CacheSYSTEM 3400 Series Features
