

NCR Atleos Activate Enterprise

The application for modern ATMs and ITMs

Activate Enterprise is an advanced ATM application that provides greater simplicity and lower cost of ownership than traditional alternatives. This is achieved by being ready to work straight out of the box with low levels of implementation cost and effort, by supporting two user modes (ATM and ITM), supporting enhanced self-service (ESS) and having broad based marketing capabilities included.

Benefits of Activate Enterprise

Activate Enterprise provides the safest investment for the future, being compliant with current industry standards and regulations, and delivering award winning alignment to the ATMIA Next Gen architecture. Activate Enterprise uses contemporary digital (web based) technologies, reduces reliance on legacy technology and takes the ATM out of its silo and into mainstream banking IT.

Activate Enterprise delivers ultimate consumer experience and flexibility. It provides a pathway to branch transformation and expanded transaction sets and delivers the modern new user interface that your consumers and IT professionals expect.

This award-winning solution is the most complete, forward thinking and most reliable choice, based on NCR Atleos' years of global industry leadership in advanced, highly configurable, multi-vendor self-service applications and implementation
